How to get thousands of legitimate Facebook likes in 3 days or less

When you create a brand new Facebook fanpage you will have 0 likes and this is an issue when it comes to running Facebook ads. Facebook's algorithm takes into account page likes and if you have 0 or close to 0 it will negatively impact your ads performance. I put together step by step instructions showing you how to run a "likes campaign" to third world countries so that you can get 1,000 - 5,000 likes to your page ethically and from real people. These people have almost 0 chance of engaging with your page or purchasing from you, they are only for getting our fanpage likes up. You can expect to get likes for \$0.01 - \$0.05 cents each, this means 5,000 likes will cost between \$50 - \$250 USD. Time to get 5,000 likes is 1-3 days.
